KEY DATA

Reno Lee is the Founder Director of UIG Architects Sdn Bhd.

He graduated in 1988 with a Bachelor of Architecture (Honours) from the University of Melbourne, Australia and has worked in Australia and Singapore prior returning to Malaysia in 1993.

He was appointed Director of DP Architects Sdn Bhd in 1994, where he is primarily responsible for operations and design, master planning and concept planning for commercial, mixed developments, residential, refurbishment and asset enhancement, industrial, hotels and resorts, institutional, transportation and infrastructure projects.

Towards the end of 2011, Reno together with fellow DP Architects Sdn Bhd Director, Seong Pick Choong, formed a new architectural practice, UIG Architects Sdn Bhd to further develop their common interest in a Global Identity for their architectural works. Their shared concerns for Place, Identity, Branding and an Excellent Built Environment remain important aspects of their work.

Reno's direct and hands-on leadership has guided successful projects in Malaysia and the region. He actively promotes the firm's mission to deliver excellent value to clients through creative architecture and reliable project management.

His expertise extends from pre-design fields (programming, feasibility studies, master-planning) to project and contract management. He has participated as Design Consultant in a number of Contractor-led Design and Build Bids, both locally and overseas, for Transportation Projects as well as Asset Enhancement Ventures.

He is a Certified Mediator since 2003 with CIDB Panel of Mediators, Construction Industry Board of Malaysia, a Registered Architect with the Board of Architects Malaysia (LAM) and a Corporate Member of PAM and RAIA.
